

# HAND & BODY

*Keeping hands clean is one of the most important steps to avoid getting sick and spreading germs to others. It is best to wash your hands with soap and clean running water for 20 seconds.*

*Preventing the disease outbreak is everyone's business; by aggressively promoting proper hand hygiene, we look to partner with your facility to provide maximum safety and control of spreading harmful bacteria and viruses.*

*However, if soap and clean water are not available, use a foaming hand sanitizer. Hand rubs significantly reduce the number of germs on the skin and are fast-acting.*

*Trust hand and body hygiene at your facility with the choice of professionals, Theochem Hand & Body Products. Whether you prefer liquid or foaming products, we have the right products to meet your needs and budget.*

*In the skincare world, dirt, oil, and, sweat are enemies. When we have too much grime on our bodies, we tend to feel unclean and anxious. Washing it off is far more soothing, giving us a feeling of health and relaxation.*
