

RESTROOM

CARE

Facilities are often judged by the care and cleanliness of a restroom. Restrooms require specialized cleaning and maintenance to kill germs and eliminate malodors. An effective restroom cleaning and maintenance program gives users, customers and employees a favorable impression of your cleaning operation.

Products recommended by Theochem Laboratories, Inc. include hard surface cleaning and sanitization solutions for toilet/urinal care products and specialty products to treat difficult and stubborn issues, as well as a disinfectant program to ensure your restroom is healthy and safe.

One of the largest problems for most restrooms is odor control; whether it's a pervasive urine smell, just a general malodor, or any other, Theochem Laboratories, Inc. has a solution for it.
