

# FLOOR CARE

## RESTORER

### SPRAY BUFF

#### Ready-To-Use Shine Maintainer

- Restores gloss and reduces maintenance of finished floors
- Removes black heel marks, scuffs, and surface scratches
- Clean and polish in one step

A dual-purpose (acrylic) spray buff in a ready-to-use form designed to clean and polish in one easy operation. This product is used with a high or low-speed buffing machine to rejuvenate worn floor finishes. Produces a “wet look” shine while removing scuffs, scratches, ground-in dirt, and black heel marks. Saves time and money by avoiding stripping and multiple coat dry time. This product can be used with either high or low-speed buffing machines to remove black heel marks, tar, ingrained dirt, and surface scratches and replace them with a high gloss “wet look” shine.

#### DIRECTIONS FOR USE

Remove gross soil such as heavy tar, paper, gum, etc., and then dust mop floor. Using a spray bottle, spray two or three sprays in about four feet by six feet. DO NOT OVER WET.

With a nylon or polyester spray buff pad, make one pass with the floor machine to spread out the product, return and buff to a high gloss. Flip over or change spray buff pad as necessary.

After buffing is complete, dust mop the floor if dust is present. If the floor shows uneven wear, heavy build-up, or deep ground-in dirt, the floor should be stripped and refinished.

A substantial base (3 coats) is required to obtain the maximum gloss on the floor.

**NOTE:** Heavily trafficked areas may occasionally require additional floor finish. When re-coating is necessary, the finish may be applied directly over spray buff. Clean the floor and re-apply the finish.

#### IMPORTANT SAFETY INFORMATION:

#### DANGER

May damage fertility or the unborn child.

#### PRECAUTIONS:

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing, eye protection and face protection. Store locked up. Dispose of contents and container in accordance with local, regional, national and international regulations.

#### FIRST AID:

If exposed or concerned: Get medical attention.

#### CONTAINS:

2-(2-methoxyethoxy)ethanol (111-77-3), Dibutyl phthalate (84-74-2).

#### APPLICATIONS

- Nursing homes
- Schools
- Hospitals
- Health care applications

#### SPECIFICATIONS

Color .....	White
Fragrance .....	Fruit-like
pH Range .....	8.0 - 9.0
Form .....	Liquid
Dilution Range .....	Ready to Use

#### PACKAGING
